

Yoke Light

Add-on Light for AC Yokes

The Yoke Light is an add-on accessory for Y-1 and Y-7 AC yokes which provides focused, visible light to the yoke inspection area when the yoke is activated.

The 10 lumens strong light is designed to enhance visible detection of flaws and discontinuities under low conditions and in difficult to reach areas not accessible to a secondary light source. The Yoke Light attaches quickly and easily to the rear or front leg without impeding the yoke's ergonomic design or functionality, and it's rugged, high-impact construction and shock-resistant bulb have been designed to withstand the daily rigors and abuse of NDT testing. Comes with yoke light collar fixture, light bulb (replacement bulb PN 621788), mounting bolt and washers.

For use with Y-1 and Y-7 AC magnetic yokes.

FEATURES

- Fast, easy installation
- No wiring connection necessary
- Automatically activated when yoke is energized
- Snap-in standard bulb replacement

SPECIFICATIONS COMPLIANCE

- ASME BPVC
- ASTM E709
- ASTM E1444
- ASTM E3024
- ASTM E2297
